

Teenager Mental Health Dashboard — Key Insights

- The data covers 1,200 teenagers with an average age of about 16 years.
- On average, teenagers spend about 5 hours a day on social media and sleep about 6 hours a night.
- The group is almost evenly split by gender: 51% male and 49% female.
- More females (55%) show signs of depression compared to males (45%).
- Instagram is the most used platform (411 users), followed closely by TikTok (398) and using both apps (391).
- Boys spend slightly more time on social media than girls (4.56 vs 4.51 hours) and also report slightly higher stress (5.47 vs 5.42).
- Age 13 has the highest depression count (200), higher than any other age group.
- Depression counts stay fairly high and steady across ages 15 to 19 (between 162 and 180).
- Anxiety levels are the highest and change the most compared to stress and addiction levels.
- Overall, heavy social media use is linked with higher stress, anxiety, and depression, especially in younger teens and girls.
